de Waal and Okeson's data, the assumption of a linear relationship used by Rosehart is not valid. By graphical interpolation from the plot based on de Waal and Okeson's values at pH of 7.5, 8 and 8.5, the following results at a pH of 8.15 were obtained:

T°C	$Co^{++} \times 10^4$ k mole / m^3	K_r (ref. 2) pH = 8.15 / sec^{-1}	K_r (ref. 1) / sec^{-1}	% Dev.
20	0.3	140	147	−5
	1.0	500	437	+12
	2.0	960	850	+11

Considering the different experimental conditions reported in our paper and to those used by de Waal and Okeson the differences in the predicted and experimental values are not significant.

INDEX OF PAPERS

Application of Thermodynamics to the Athabasca Tar Sands (Note) — J. Leja and C. W. Bowman 479
Behavior of Gas Bubbles in Vertically Vibrating Liquid Columns — Eliezer Rubin 145
Boiling Heat Transfer from a Rotating Horizontal Cylinder — A. A. Nicol and J. T. McLean 304
Calculating Complex Chemical Equilibria by an Improved Reaction-Adjustment Method — W. R. Smith and R. W. Missen 269
Calculation of Ternary Equilibrium Vapor Compositions from Total Vapor Pressure-Liquid Composition Data. Shinn-Der Chang and Benjamin C.-Y. Lu 273
Chlorine Exchange Resins — M. Wayman, H. Salamat and E. J. Dewar 282
Combined Free and Forced Convective Heat Transfer — Treatment of Yuge's Data (Note) — C. Narasimhan and W. H. Gauvin 141
Continuous and Discrete Time Response Analysis of the Backflow Cell Model for Linear Interphase Mass Transfer on a Distillation Plate — B. R. Dickey and L. D. Durbin 369
Critical Fluid Velocity and Power Requirement for the Startup of a Capsule Pipeline — O. Figueiredo and M. E. Charles 62
Current Trends in Chemical Metallurgy — V. N. Mackiw 3
Densities of Hydrocarbons in Their Saturated Vapor and Liquid States — Michael L. Bradford and George Thodos 277
Dependence of Electrostatic Charging Currents on Fluid Properties — H. D. Coodfellow and W. F. Graydon 342
Diffusion-controlled Adsorption Processes — R. B. Anderson, A. E. Hamielec and G. R. Stifel 419
Diffusion in Binary Liquid Mixtures at Infinite Dilution — M. A. Lusis and G. A. Ratcliff 385
Dissolution of Carbon Steel Scrap in Hydrochloric Acid — Tyson Rigg 264
Distribution of Lengths in the Breakage of Fibres or Linear Polymers — Simon L. Goren 185
Drag Coefficients of Evaporating Spheres in a Turbulent Air Stream — A. Clamen and W. H. Gauvin 73
Dynamic Response of a Double Effect Evaporator — H. Andre and R. A. Ritter 259
Effect of Particle Size Distribution on Packing Density — H. Y. Sohn and C. Moreland 162
Effect of Surface Active Agents on Sorption Isotherms of a Model Food System, The — Theodore P. Labuza and Max Rutman 364
Effect of Various Parameters on the Level of Mixing in Continuous Flow Systems — Leonce Cloutier and A. Cholette 82
Effectiveness Factors for Heat Transfer in Fluidized Beds — Louis J. Petrovic and George Thodos 114
Effects of Turbulence on Particulate Heat and Mass Transfer — A. Clamen and W. H. Gauvin 223
Effet du diamètre de l'agitateur et de la largeur des chicanes sur le niveau d'agitation en régime continu et sur la puissance dissipée — J. Garceau, Leonce Cloutier and A. Cholette 88
Electrode Contact Resistance in a Fluidized Bed (Note) — Harry J. Glidden and Allen H. Pulsifer 476
Electrolytic "Sintering of Nickel Powder", The — I. H. S. Henderson and S. G. Ladan 361
Equation of State for Liquids, An — P. Mitra Chaudhuri, G. P. Mathur and R. A. Stager 132
Etude cinétique de la déshydratation du sulfate de cuivre par thermogravimétrie et thermogradientimétrie — Serge Kaliaguine 446
Experimental Investigation of Heat Transfer to Water in Film Flow. An
Part I — Non-boiling Runs with and without Induced Swirl — L. S. Herbert and U. J. Sterns 401
Experimental Investigation of Heat Transfer to Water in Film Flow. An
Part II — Boiling Runs with and without Induced Swirl — L. S. Herbert and U. J. Sterns 408
Experimental Investigation on the Migration of Submicroscopic Droplets from the Evaporating Surface (Note) — C. Narasimhan and W. H. Gauvin 138
Experimental Study of the Effect of Dump Packing on Wall to Fluidized Bed Heat Transfer, An (Note) — C. E. Capes, J. P. Sutherland and A. E. McIlhinney 473
